Awareness Program on Future of Science
(To elementary school pupils)

The visit of Dr. K. Venkata Rao to the Mandal Parishad Upper Primary School in Kondugaripalle village is a testament to the importance of engaging young minds in the field of fundamental sciences. His interaction with the students not only highlights the relevance of physics and other scientific disciplines in our current times but also serves as an inspiration for these young learners. By explaining relevant topics, Dr. Rao has likely sparked curiosity and motivation among the students, encouraging them to explore the wonders of science and its applications in everyday life. Such initiatives are crucial for fostering a love for learning and for building a strong foundation in critical thinking and problem-solving skills, which are essential in the rapidly evolving world of science and technology.
